

PYRUM SIMIYU WAFULA

I am Pyrum Wafula Simiyu. I'm a healthy young boy born on 12th August, 2004 in Luhya Location, Bungoma County, Kenya. I'm the last born in a family of two brothers and one sister. My parents are Leonard Kwata and Clare Musombi. They are both alive.

I started school from a nearby primary school called Luuya and later transferred to Namukongo Admirals Academy, not far from home too, in search of better and quality education. From the onset of early education programs, I've excelled really well due to my hard work in school. My parents have had a great impact and influence on my life, trying everything possible within their means to pay for my school in my entire primary school education. They've paid close attention to ensure that I overcome the challenges I face.

I try to balance all subjects but my favorite are Mathematics, Science and Social Studies because I find them simple. Languages, that is English and Kiswahili, are a bit hard for me but I try anyway. My dedication and hard work in studies brought forth good fruits as I scored 360 marks in the Kenya Certificate for Primary Education exams. Coming from a needy background, this was a great milestone for me since I struggled many at times to get what was required in school. I aspire to become a teacher, if not, an engineer, so that I can help the less fortunate in the society.

PYRUM SIMIYU WAFULA

I'm good at playing football, in the position of a midfielder. Last year, our team played up to the District level. Many rejoiced in our performance including our teachers and district officials. I practice a lot, at least twice a day to become more perfect and active as well as keeping my body fit.

I'm a Christian and I fellowship with Grace Community Church, just within our locality. This has helped me grow spiritually.

I know of Living Hope High School as a good institution with good students and teachers. I heard there are well-wishers who support the bright but needy students. It also performs well in exams and that's why I opted to apply to join here. I live at a close distance therefore I've firsthand information about it.

I'm happy for getting a chance to come to LHHS. It's a rare opportunity which

only goes to a few lucky kids who happen to have performed well like I did. I expect to do well in my studies when I join here, be disciplined at all time and pass my exams so that my future can take a good course. I'd like to ape my elder brother and sister who are readily available to

advise me accordingly.

My parents are poor. Much as they tried and supported my primary education, they cannot afford to do so in high school. Should it be the case, it means they will have to forego so many things but still won't manage to help me get all the

necessary items required in school and pay for the tuition fee. We live in a mud house just like many ordinary Kenyans. We do very small scale farming and harvest little yields which can't sustain us through the next harvesting season.

To anyone reading my story and willing to help, I'll be very happy for your support. Help me so that I can be of use to my family and the community I come from when I finish school.

To God be the Glory.
