

Depora Sifuna

Jambo! My name is Depora Sifuna. My birthday is the 24th November 2007. I will be turning 15. I have both parents. My dad is Simon Sifuna and my mom is Stella Mukhwana. I come from a polygamous family. My dad has 3 wives, my mom is the 3rd wife to him. It's so sad

that I have never celebrated my birthday since my parents do not value it and they don't have funds.

My childhood experiences have been full of challenges. One that was much serious was struggling with School fees. I feared being sent home and sad to miss a whole day of learning. I have always told myself that a minute wasted shall never be recovered.

I used to participate in debates while I was in primary school. Through that I was able to develop my social skills. As I was growing, I was able to identify my strengths and weakness in all areas of life but mostly in academics. In terms of Subject performance, my strengths were displayed in Social Studies, Mathematics, English and Kiswahili. I have a

weakness in Science; I hope to up my game now that Science here is divided into many units.

I want to become a lecturer when I grow up. I want to teach Undergraduate university students to prepare them for their future job. I love to Sing Gospel music and dance.

With Kind regards

Depora Sifuna
