

## Purity Situma.

My name is Purity Situma. I was born in April 19<sup>th</sup> 2008. I am 14 years old. I have both parents. I am the 4<sup>th</sup> born in the family of 5 none of my sibling has been able to continue with education because of issues with school fees. My parents really tried their best but nothing could work out. The teachers kept sending us home until they gave up with learning. I stayed at home for one year without going to school. Many thought I had completely dropped out of school but for sure I was looking for the fees. I got enough for one whole year and yes, I got registered for the national test and did very well.

My mother sells greens and tomatoes to get money for other important items in the house. My elder brother supports us with any little money he gets for us to eat and cloths.

My best subject is Biology. I would like to be a teacher in college. Furthermore, I play football just for fun especially when I am free.

I chose Living Hope High School because the teachers are so much cooperative. They support students with all their passion and old students do not harass new form ones. It's a God centered school where everything starts with a prayer.

I'm hoping to get support from anyone who would like to be my sponsor and make this dream a reality.
