

To: My Dear Sponsor

From: Moses Khaemba

How are you? I hope you are fine and healthy. I am fine too.

I am Kenyan citizen by birth, born on 17th January 1998. I have five siblings, three brothers and two sisters. I am the fourth born. I started schooling in 2004 and finished grade eight examinations 2012. I have been learning at Living Hope High School for secondary school education. God has been working miracles in my life in different ways. My family background is so poor that when I finished grade eight exams, hopes of continuing with education were shattered. I thank Him a lot because He provided ways and I got a sponsor from America for six months. I nearly lost hope again when he deserted me.

I honestly thank God because He later again provided for me other sponsors who have been paying for my secondary school education fees until the last grade twelve. I have ambitions of being an aeronautical engineer but my current sponsors have not assured whether they will continue supporting me further.

I have a vision of sponsoring many orphans and poor children in future. This however can only be achieved if I will be educated and with a good earning job. I therefore pray that God may open more financial doors for you so that you can support me to acquire university education. In addition, I am a talented soccer player. If I achieve my dreams, I also have hopes of sponsoring upcoming soccer players who lack support. I know that all this are possible through God and with university educations. I pray that may God use you to fulfill my dreams. I will be really thankful for your support.

I promise to remain loyal to God and the authority and work head. I also promise that I will never let you down through misconduct or failure. May God bless you. Your family and friends.
